OUR PROCESS

Longevity's process insight and understanding of the challenges associated with supporting all aspects of business strategy is the result of many years of experience. Longevity's consultants are vendor agnostic and will work within your organization's existing technology stack, making recommendations for COTS or Open Source analytics tools as needed. It is our goal to use our real-world experience and vast knowledge of technology and business to provide you with the best possible solution for your needs.

Enterprise Technology
Helping Our Customers Maximize their Resources

Longevity has the expertise and proven methodologies required to provide software engineering support services for all phases of the development life cycle. Our consultants have years of experience designing and developing complex systems for numerous government and commercial customers. We offer visionary guidance in innovative technologies and approaches such as cloud based computing, mobile, agile, and other areas. Through the development of new business services and innovative approaches, our clients are able to enhance customer relationships, improve service delivery, and better manage their business data.

Our Capabilities Include:

Cloud Based Solutions

Cloud computing allows companies to realize the benefits of sharing IT resources throughout their organizations and maximizing their effectiveness. These resources can be dynamically reallocated based on demand, both locally and globally, and help reduce the cost of dedicated hardware, licensing and rack space. Longevity's team of experts is poised to help you leverage cloud computing in your organization, through our Cloud Migration Strategy and Cloud-based Application Development services, allowing you to cut costs and focus on your core business.

Business Analytics

Based on data and statistical methods, Business Analytics (BA) is a combination of skills, technologies and processes that can be implemented on a large or small scale to help you gain insight into your organization. Longevity's Business Analytics (BA) consultants conduct in-depth research into your company's past performance, bringing new awareness and understanding of your business' strengths and weaknesses. The data analytics and business reporting solutions we provide, including Enterprise Data Analysis, Enterprise Intelligence and Dashboard Reporting, will help you make key decisions and drive future business planning.

Portal Development

A web portal brings information together from diverse sources in a uniform way, allowing the client to determine the site's intended purpose and needs of their end-users. Longevity's team of experts have real-world experience creating and implementing portals, employing strategies and procedures that will create a site that provides a consistent look and feel with access control and procedures that will enable you to meet your business requirements and achieve mission goals.

Mobile Applications

Mobile Application Development is becoming more and more important in today's marketplace. Creating applications that allow users to take advantage of their device's unique features can help a business connect with their customers in a much deeper, real-time manner. Longevity's consultants are able to leverage their expertise to ensure that your organization is producing mobile products that speak to your target market, enhancing their interaction and engagement with your company and its products and services.

OUR MISSION

Team Longevity is dedicated to providing the best possible solution for an organization. Drawing from a vast pool of knowledge and expertise, we are committed to ensuring that our customers are satisfied from day one. The bottom-line result is improved productivity, increased collaboration and greater efficiency in mission critical operations.

A True Industry Partner
Creating Efficiencies Across Organizations

Longevity Consulting, LLC (Longevity) is an SBA 8(a) certified, Service-Disabled Veteran-Owned, Small Disadvantaged Business with over 12 years of experience providing information technology, solutions-based consulting services. Longevity offers expertise in facilitating enterprise-wide IT strategic planning, enabling clients to align their strategic vision, business processes and information needs with their applications and technology infrastructure. Longevity's role is that of a true industry partner, in which we support the process from beginning to end, delivering quality services and continuously working to exceed the client's expectations. We have an outstanding record of past performance helping our clients achieve greater customer and employee satisfaction, eliminate waste and reduce expenses throughout their organizations.

Past Performance

National Science Foundation
Portal Development

Research.gov is a complex effort focusing on implementing core enterprise services that will enable NSF to realize its target grants management architecture. Longevity was responsible for authoring, editing, and executing upon the complete set of artifacts that support each phase of the full software development life cycle (e.g., analysis, design, development, test, 508 compliance, etc.) for a host of Research.gov services.

All projects Longevity supported conformed to a rigorous set of standards defined by NSF's Continuous Improvement Process (CIP), which defines the standard contractual project documentation and processes required for all software development activities. Longevity used a detailed Program Management Plan to define staff roles and responsibilities as well as procedures for identifying risks and risk mitigation strategies. Additionally, post project reviews and lessons learned sessions were performed and documented to ensure historical problems were not repeated. Longevity also played a critical role in identifying agency stakeholders, defining target messages and briefing said stakeholders on the implications of the new enterprise identity and access management services. Our consultants' professionalism, attention to detail and knowledge of the underlying business processes were invaluable in helping all stakeholders experience a positive and seamless transition to the new identity management system.

Department of Education
Cloud-Hosted Peer Review Panel Assignment System

Longevity has developed a Cloud-hosted, Panel Assignment System that automates application and reviewer panel assignments based on the unique competition rules of each grant competition. This competition website solution supports links to the Department of ED's peer reviewer orientation webinar, downloadable versions of Technical Review Forms, and links to other application and peer review support materials. This dynamic solution enables users to publish any required competition website changes within 24 hours of receiving feedback from competition staff.
