Portal Development

Custom solutions that deliver high quality results

A web portal brings information together from diverse sources in a uniform way, allowing the client to determine the site's intended purpose and needs of their end-users. Longevity's Portal Development team is committed to working with your organization to create a site that provides a consistent look and feel with access control and procedures that will enable you to meet your business requirements and achieve mission goals. Longevity's team of experts have real-world experience creating and implementing portals, employing strategies and procedures that will ensure success in every step of the process.

OUR PROCESS

Longevity's process insight and understanding of the challenges associated with supporting all aspects of business strategy is the result of many years of experience. Longevity's consultants are vendor agnostic and will work within your organization's existing technology stack, making recommendations for COTS or Open Source analytics tools as needed. It is our goal to use our real-world experience and vast knowledge of technology and business to provide you with the best possible solution for your needs.

Longevity's Proven Strategies to Ensure Success

Longevity's solutions are based on the software development lifecycle in order to ensure quality results. Our team works with you to identify stakeholders and define target messaging. The end result provides a consistent look and feel that clearly projects your message based on the intended audience. Our solutions can accommodate multiple types of user groups for a particular portal-based service, ensuring increased levels of customization and quality outcomes for your project.

OUR MISSION

Team Longevity is dedicated to providing the best possible solution for an organization. Drawing from a vast pool of knowledge and expertise, we are committed to ensuring that our customers are satisfied from day one. The bottom-line result is improved productivity, increased collaboration and greater efficiency in mission critical operations.

OUR ROLE

Longevity's role is that of a true industry partner, supporting the process from beginning to end. We have an outstanding record of past performance helping our clients achieve greater customer and employee satisfaction, eliminate waste, improve efficiency and reduce operational costs throughout their organizations.

A True Industry Partner

Ensuring quality outcomes

Longevity Consulting, LLC (Longevity) is an SBA 8(a) certified, Service-Disabled Veteran-Owned, Small Disadvantaged Business with over 12 years of experience providing information technology, solutions-based consulting services. Longevity offers expertise in facilitating enterprise-wide IT strategic planning, enabling clients to align their strategic vision, business processes and information needs with their applications and technology infrastructure. Longevity's role is that of a true industry partner, in which we support the process from beginning to end, delivering quality services and continuously working to exceed the client's expectations. We have an outstanding record of past performance helping our clients achieve greater customer and employee satisfaction, eliminate waste and reduce expenses throughout their organizations.

Past Performance

Portal Development *National Science Foundation*

PROJECT OVERVIEW:

Research.gov is a complex effort focusing on implementing core enterprise services that will enable NSF to realize its target grants management architecture. Longevity was responsible for authoring, editing, and executing upon the complete set of artifacts that support each phase of the full software development life cycle (e.g., analysis, design, development, test, 508 compliance, etc.) for a host of Research.gov services.

LONGEVITY'S ROLE:

- Analysis of existing NSF business processes and recommendations of alternatives for re-engineering the business process to better fit the needs of the target federated model, accommodating multiple types of user groups (e.g., internal, external, public, institution) for a particular portal-based service
- Analysis and Design of E-Authentication and Identity Management
- HSPD-12 Program Management, Capability Development, Functional Analysis and Technical End User Training
- Integrated the enterprise Identity Management system with the enterprise ERP System.
- Analysis and Design of a Portal Service Implementation Strategy
- Supported data transformation and business reporting: Oracle Business Intelligence Enterprise Edition (OBIEE).
- Provided data analysis, cleansing, transformation and load support for the enterprise data store and the Unified Identity Schema, which stores data for enterprise identity management services

BENEFITS REALIZED:

Longevity used a detailed Program Management Plan to define staff roles and responsibilities as well as procedures for identifying risks and risk mitigation strategies. Additionally, post project reviews and lessons learned sessions were performed and documented to ensure historical problems were not repeated. Longevity also played a critical role in identifying agency stakeholders, defining target messages and briefing said stakeholders on the implications of the new enterprise identity and access management services.
