

SOLUTIONS THROUGH PEOPLE, PROCESS AND INNOVATION

Longevity is a customer-focused management consulting firm that partners with clients to achieve goals, improve outcomes, and accomplish mission objectives.

OUR FOCUS

PEOPLE

Our people practice is at the heart of what we do. Highly motivated, highly skilled, and highly efficient people are needed to solve complex challenges. Our tried and tailored people solutions mean things will be done right, according to established federal HR policies and standards.

PROCESS

Our people practice is at the heart of what we do. Highly motivated, highly skilled, and highly efficient people are needed to solve complex challenges. Our tried and tailored people solutions mean things will be done right, according to established federal HR policies and standards.

INNOVATION

Our Innovation practice brings clarity to Federal IT modernization and operations, with all the regulatory requirements and constantly changing technologies. Our senior IT advisors meet you where you are and have extensive experience to help you get where you need to be, making sure you adhere to federal requirements along the way. Our technologists are supporting highly-visible IT transformation efforts across the government. We know it's not easy. We are here to ensure you will be successful.

Our Work

General Services Administration (GSA) Centers of Excellence (CoE) IT Transformation

The CoE's highly skilled, agile teams accelerate federal technological transformation. Our strategic management experts partnered with the Centers to ensure the success of their engagements. Working with their SMEs in Innovation Adoption, Cloud Adoption, Contact Center, Customer Experience, Data Analytics, Artificial Intelligence and Infrastructure Optimization on a day-to-day cadence, our experts digitized more than 12 core operations, produced more than 100 resources and supported the distribution of thought leadership government-wide.

U.S. Department of Agriculture (USDA) Forest Service (FS) Agile Program Management

Forest Service (FS) Human Resources Enterprise Solution (HRES) develops and implements innovative strategies and tools needed to continuously digitize core operations for their workforce of 40,000 permanent and temporary employees. Our experts support HRES and the project management office with the transformation and delivery of more than 30 process-improvement projects annually. To implement efficiency-boosting technology, our team has established more than a dozen project roadmaps, providing the tools and guidance needed to support change.

U.S. Department of Housing and Urban Development (HUD) Federal Housing Administration (FHA) Business Process Optimization

HUD's Office of Single Family Program Development (SFPD) develops and implements policies and operating procedures for the FHA. Engaging with multiple stakeholder groups, our SMEs reviewed all processes and systems, then developed a PMO to support a large-scale, high-visibility policy automation project. We identified and deployed numerous process improvements – a redesigned SharePoint site aligned with process flows; revamped SOPs and program forms aligned with policy directives and legislative requirements; an automated underwriting solution; and a mobile SFP handbook. Our mission-critical work expanded the FHA's single-family lending business and standardized policy distribution to 80,000 lenders nationwide.

Veterans Administration (VA) Veterans Health Administration (VHA) Strategic Workforce Planning

To enable informed workforce decisions, mitigate staffing risks and improve both the employee and customer experience, our team produced functional assessments and staffing models for 18 VISNs, outlining how the VA's Workforce Management Consulting can empower consistent, timely care for veterans and mitigate burnout for VHA's more than 300,000 employees. With a data-driven optimization strategy, we addressed redundancies, clarified roles, and improved reporting structures.
